Inpatient Hospital Admits

Another desired outcome of the program was to reduce the number of Inpatient (IP) Hospital Admits for members who had completed 12 months in the Breathe at Ease program as compared to the 12 months prior to entering the program.

Target goal - a 20% reduction in IP admissions

Outcome - achieved a 67% reduction with 33 IP admissions prior to entering the program and 11 admissions for the 12 months after entering the program.
2015 IP Admits
