PR Functional Capacity Performance Measure Algorithm

Does the patient have a primary diagnosis of COPD or ILD?

NO
Does not qualify for measure

YES

Did the patient complete a 6 minute walk at PR program entry and completion?

NO
Does not qualify for measure

YES

Did the patient complete at least 10 sessions of PR within a 3 month period?

NO
Does not qualify for measure

YES
Include in the denominator (D)

Did the patient improve their 6 minute walk distance by, at least, 30 meters (93.48 feet) – the MCID?

NO
Do not include in numerator

YES
Include in the numerator (N)

Calculation Instructions

The % of patients with COPD or ILD who improve their 6 minute walk distance by at least 30 meters = \( \frac{N}{D} \times 100 \)
