

EMR-based Cardiac Rehabilitation Referral as an “Opt Out” Process in Diagnosis-Related Order Sets

The screenshot shows an EMR interface with a sidebar on the left and a main content area. The sidebar contains a list of menu items: Snapshot, Summary, Chart Review, Care Everywhere..., Synopsis, Results Review, Review Flows..., Problem List, History, Notes, Demographics, Medications, and Allergies. The 'Order Sets' menu item is circled in red. The main content area is titled 'Order Set Preview' and contains a search bar with a '+ Add' button. Below the search bar is a 'Suggestions' section with two checkboxes: 'General Adult GI Bleed' (unchecked) and 'General Cardiology' (checked). Below this is a note: 'Right click on an Order Set to add to favorites.' At the bottom of the sidebar are 'Restore' and 'Close F9' buttons. The main content area has a toolbar with icons for back, refresh, home, print, and copy. Below the toolbar is a table with the following content:

Discharge Referrals	
<input checked="" type="checkbox"/> Referral	
<input checked="" type="checkbox"/> AMB REF PREVENTIVE CARDIOLOGY (CARDIAC REHAB)	Internal Referral

Below the table is a section titled 'Physician Consults' with a sub-section 'Physician Consults' containing a checkbox for 'Consult to Cardiology' and a list of fields: 'Reason for Consult?', 'Consult Type:', 'Has the consultant been notified?', 'Date Notified (STAT consults only):', 'Time Notified (STAT consults only):', and 'Person Notified (STAT consults only):'.
